# Q&A

## Cyber Security

| Question | Answer |
|---|---|
| How to handle if user credentials leaked to non-authorized people? | Contact Danelec. The emails created are checked against the contract during initial creation. Two factor is under consideration. |
| Could links used for download of data from the VDR be forwarded? | Yes. The links are specific to the requestor but can be shared for ease of use. |
| Is the data transmitted encrypted? | Yes. The VRS also acts as a firewall and proxy server that protects the VDR. |
| Is there direct access to the VDR? | The VRS employs a “one-way” protocol to during monitoring of the VDR. Only when performing remote operations requests are direct to the VDR. The exception is VDR Remote Configuration feature. |
| How does VDR Remote Configuration work? | By time restricted invitation. Invitee must have a Danelec valid certificate. The master of the vessel must flip the service switch |
| Does the system have cyber security Type Approval Certificate? | The VDR & the VRS complies with IACS UR E27 and IEC 61162-460 Ed. 3.0. |
| What security measures are on the system? | Hardened and proprietary Linux OS. Data is transferred over a mutual-TLS/ HTTPS connection. |
| Is there a documented risk assessment? | All Danelec hardware is annually PEN tested. |
| Can software be updated remotely? | The VRS can be updated by Danelec service. The VDR cannot. |

## VRS Installation

| Question | Answer |
|---|---|
| Which version of the VRS do I need? | 1305847 Cloud-enabled VRS 002 G2. Previous versions VRS 002, VRS 002 G2 and VRS 003 will also work. |
| What is an important prerequisite for installation? | The Vessel IT information is needed for connectivity to the cloud. DHCP simplifies the installation. |
| How to check if cloud connection is established? | VRS user interface supports this with visual indications of status. |
| Can a crew member install the VRS? | Our recommendation is to use service partners for installation. |
| Does the technician need to update a configuration file? | No. |
