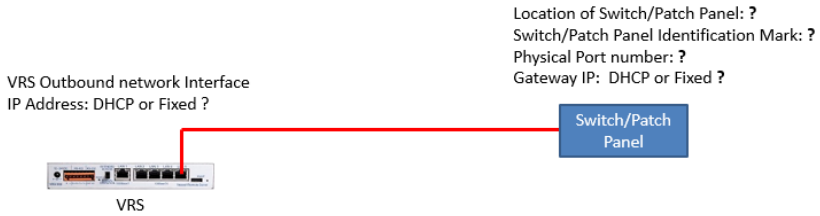
DanelecConnect IT Information Form

Use this document to align Vessel IT with the DanelecConnect installation, to ensure communication to shore can be established at the time of the installation. Below simplified installation drawing shows what needs to be known and arranged before the installation.



Outbound Communications	
SFTP (TCP/2222)	104.45.91.96:2222
	sftp02.danelecconnect.com:2222
HTTPS (TCP/443)	https://global.azure-devices-provisioning.net
	https://danelec-control.azure-devices.net
	https://api.danelec-marine.com

Fill out all tables below:

Vessel	
Name:	
IMO:	

Danelec VRS IP address *(Select one)*			
DHCP (Preferred)	[ ]	Fixed (Optional)	[ ]
		IP Address	: : :
		Subnet mask	: : :

Outbound Gateway IP Address *(Select one)*			
Gateway IP provided via DHCP (Preferred)	[ ]	Fixed Gateway IP(Optional)	[ ]
		IP Address:	: : :

DNS *(One DNS address is mandatory)*			
DNS via DHCP(Preferred) *(Requires Gateway IP is provided via DHCP)*	[ ]	Static DNS (Optional)	[ ]
		Static DNS Server 1:	: : :
		Static DNS Server 2:	: : :

Physical outbound connection for VRS	
Location of switch/patch panel:	
Identification and brand/model of switch/patch panel:	
Port on switch/patch panel for VRS to be plugged in to *(Please provide a fixed port number)*:	

Vessel IT responsible *(IT responsible must be available during installation for online troubleshooting)*	
Name:	
Email:	
Phone:
